Letter

Dear Sir:

This submission is made in response to the final rejection mailed 8/16/93. It is believed that this submission overcomes the rejection set forth in the final rejection.

Attached and submitted herewith is a new terminal disclaimer which disclaims any portion of the term of a patent awarded on this application that extends beyond the life of U. S. 5,181,556. This disclaimer is signed by the President and Chief Executive Officer of the assignee of this application and of the parent application U. S. 5,181,556.

If there are any charges due in connection with the filing of this disclaimer, please charge such amounts against my deposit account which is Account No. 03-2450. A second copy of this letter is enclosed in the event that it is required in connection with any such charges. It is noted that a terminal disclaimer was previously filed with permission to charge this same account.

It is respectfully submitted that with this disclaimer the double patenting rejection should be removed. It is also believed that, since the art rejection has been overcome as shown by the last rejection, that this submission places this application in condition for an allowance. Therefore a Notice of Allowance is respectfully solicited.

Respectfully submitted,

Stanley Z. Cole
